

Bikeways Map

San José Bicyclist & Pedestrian Program

The City of San José **Bicyclist & Pedestrian Program** works to improve bicyclist and pedestrian access and mobility throughout the city. As part of the City's Department of Transportation, the Bicyclist & Pedestrian Program designs and constructs physical improvements such as sidewalks and bike lanes. To fund projects, the Program actively seeks and administers regional, state and federal grants. The Program also coordinates with other City programs (such as the Trails Program and the School Safety Program) as well as with other agencies (such as neighboring cities, the county, and Caltrans).

The **Bicyclist & Pedestrian Program** administers the City's Bicyclist & Pedestrian Advisory Committee (BPAC). BPAC consists of appointed volunteers who provide advice and suggestions on how to improve our community for bicyclist and pedestrians. BPAC meets six to eight times per year. Its meetings are open to the public. To receive email notification of meetings, send your email address to john.brazil@sanjoseca.gov. San José's Bicyclist & Pedestrian Program also offers Free Bicycling Skills Classes. For details, see the "Bicycling Skills Classes" section on the back of this map.

Using This map

This map provides general guidance on public bicycling facilities in the City of San José. While state law allows bicyclist to ride on any public street (except posted highways, freeways and bridges), San José has installed several bikeways to improve bicycle access and accommodation. State law defines three types of Bikeways:

- Bike Paths**, which are trails separate from the road;
- Bike Lanes**, which are on-street facilities with a striped shoulder and signs;
- Bike Routes**, which are on-street facilities with signs, but no roadway stripes.

Bike Routes and Bike Lanes may exist on any type of street. Before bicycling on a street for the first time, you may want check the traffic speeds and volumes. Generally, busy streets may be more intimidating to novice riders, who may prefer to stay on calmer side streets. Use common sense and always follow the rules of the road. When not on paths, always ride on the right side of the street, look before turning or crossing, and arm-signal before turning. Whether on street or pathway, always wear a helmet. To learn more, see the Bicycling Skills Classes section of this map. This map reflects knowledge of facilities at time of publication. Changes in facilities may have occurred since publication.

This map is funded by a state grant program titled the Transportation Development Act, Article III.

Street Smarts
Street Smarts is a traffic calming program from the City of San José Department of Transportation, designed to make our streets a safer place, and reduce the number of traffic-related accidents, injuries and deaths.
